

MOBILE CART-1

DESCRIPTION

The modern **Mobile Cart-1** has a container and a structure. The material of the cylindrical container is medium-density polyethylene through a rotational molding process which grants it higher resistance and avoids deformations.

- UV protection.
- Highly resistant to weather conditions.
- The tubular structure consists of two rear tractor-type wheels of 8" fixed to an axle and one front caster wheel of 3" for easy transportation.
- The lid is easy to detach.
- The structure has dual protection against corrosion.

FUNCTIONALITY

The **Mobile Cart-1** is ideal for solid and liquid waste collection in public buildings like schools, offices, etc.

- Manual discharging.
- Easy to clean.
- Avoids sources of infection.

CUSTOMIZATION

We can label it with the legend of the type of material or your logo according to your needs.
