

VIC-120 HD

WITH A LID-OPENING PEDAL

DESCRIPTION

The material of the trash can **VIC-120 HD** is high-density polyethylene that gathers the highest fluidity conditions and the highest resistance to hits and breaks.

- Made through an injection molding process which allows producing the body in one piece, without riveted parts, this helps avoid stress and breaking points that could affect its resistance.
- It includes UV protection that guarantees less wear and tear.
- It's composed of two pieces: lid and body.
- The slightly concave lid avoids the retention of dirt or water.
- It has a double handle on the lid for better use of discharge or deposit.
- Its conical body with a smooth interior and rounded corners avoids the accumulation of residues.
- UV protection.
- It has two 8" rubber wheels attached by a single axle that helps for a better transfer.
- It has a pedal made of a 3/8" round bar, a 3/4" x 3/16" mild steel angle, and a 2" x 2" 12-gauge anti-skid plate. These facilitate opening the lid.
- Low costs of investment and maintenance.
- Manufactured under international norms and standards for working with an automated waste collection system.

FUNCTIONALITY

- The design of the **VIC-120 HD** trash can makes for an easy deposit of waste.
- Any lift system can discharge the waste.
- Since it doesn't have edges or defects, it facilitates cleaning and discharge.
- It's adapted for interiors as its size and lightness allow you to have good movement in your activities.
