

# S120 BIOHAZARD CONTAINER

CODE: S-120

## DESCRIPTION

The **S120 Biohazard Container** provides a reliable solution for the safe and efficient management of bio-infectious waste in healthcare facilities. Built from high-strength polymer, the structure resists impacts and maintains dimensional stability under demanding operational conditions. Lightweight construction enables convenient handling, and a stackable configuration supports optimized storage and logistics across hospitals, clinics, and laboratories.

A tight-sealing lid provides secure closure and accurate container engagement. An optional wheeled base with swivel casters is available to improve mobility in clinical and medical settings.

## FEATURES

- Designed for demanding healthcare environments, the container resists corrosion and exposure to typical chemical agents, maintaining form across variable temperature ranges
- A safety-focused closure system minimizes the risk of accidental opening during movement and daily use
- A mobile base with heavy-duty caster wheels can be incorporated to facilitate smooth movement through workspaces and corridors
- Stackable empty units allow up to 50% savings in storage spaces

Biological  
waste only

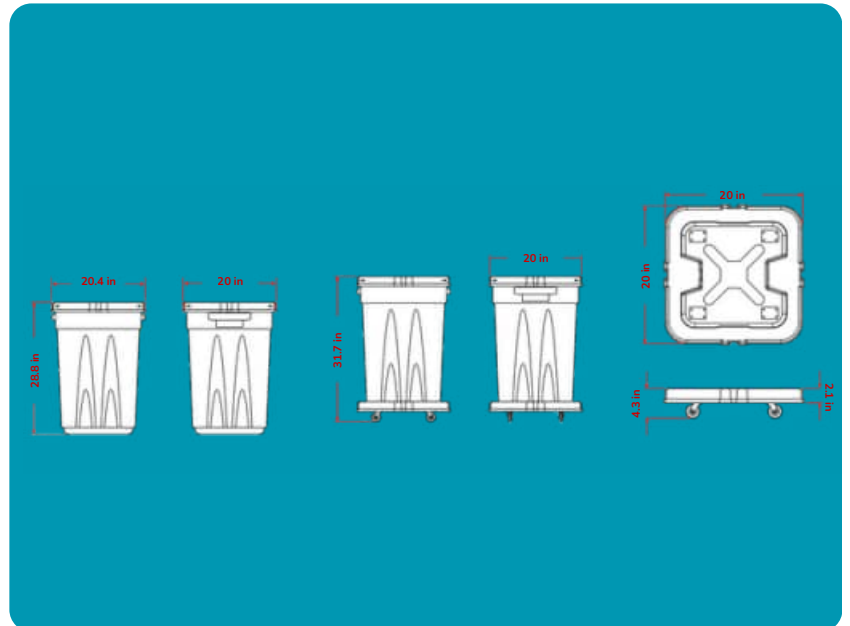

Hazardous  
waste only

Prevents odor  
propagation

## DIMENSIONS

 Length	20.7 in
 Width	20.3 in
 Container height (excluding base)	29 in
 Container height (including base)	32 in
 Weight	19.8 lb
 Capacity	31.7 gal

## DESIGN & USE

- Developed to reduce direct contact with hazardous waste and lower contamination risks
- A space-efficient, functional design supports installation in diverse medical environments such as clinics, laboratories, outpatient offices, and operating rooms
- Application of this solution contributes to compliance with NOM-087-ECOL-SSA1-2002 through safe, classified bio-infectious waste disposal
- Lightweight construction allows easy handling without auxiliary tools or specialized devices
