

200 USED OIL CONTAINER

CODE: ACEITERO 200

DESCRIPTION

The 200 Used Oil Container is purpose-built for used oil collection, delivering reliable performance in demanding industrial and hospitality environments. Manufactured from high-strength polymer, the body structure provides strong resistance to impacts, deformation, and prolonged sun exposure through integrated UV protection.

A funnel-style lid streamlines pouring while acting as an initial solid waste filter. Rounded interior corners help prevent liquid buildup and make cleaning easier. An optional set of three swivel wheels provides safe and convenient mobility. Manufacturing processes comply with international standards, ensuring compatibility with automated collection systems.

FEATURES

- Single-piece construction enhances structural strength
- Resists impacts and demanding daily use
- UV-resistant surface minimizes discoloration and material degradation
- Funnel-style lid captures solid waste during oil intake
- Ergonomic design simplifies handling and cleaning
- Optional caster wheels improve mobility and positioning
- Compatible with automated collection systems

Resists sudden temperature changes

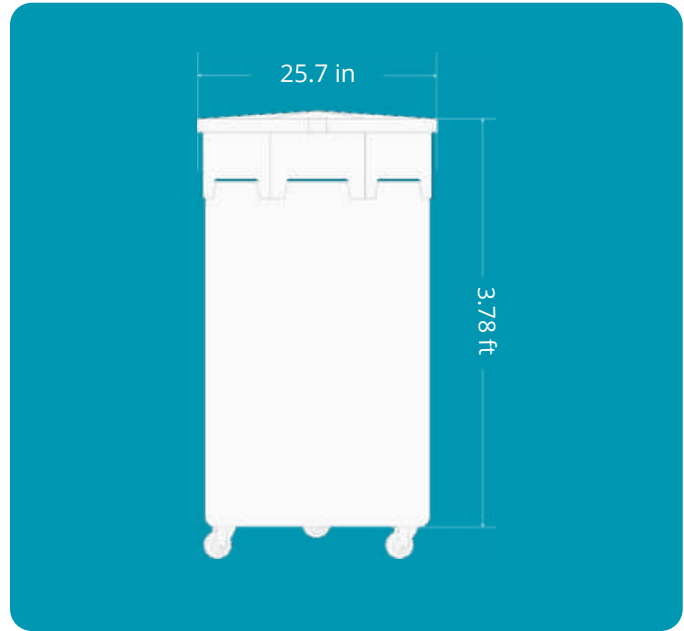

Designed for liquid storage.

Impact- and deformation-resistant

DIMENSIONS

	Height	3.78 ft
	Diameter	25.7 in
	Capacity	52.83 gal

DESIGN & USE

- Designed for safe used oil storage and handling
- Integrated pre-filter captures solid contaminants at entry
- Internal configuration reduces residue accumulation
- Convenient mobility and emptying, enhanced by optional caster wheels
- Durable construction suited for extended use with minimal maintenance

A robust design and practical performance for a wide range of spaces with the
