

150 L SANDY BIN

DESCRIPTION

The 150 L SANDY Bin is an essential safety unit for areas where prevention and rapid emergency response are critical. With a 150-L capacity, it stores a substantial amount of sand, ready for use in fires, spills, or situations requiring quick containment of hazardous materials.

Its practical design includes an integrated shovel holder, allowing quick access and immediate use of the stored material. Additionally, its stackable structure optimizes storage space in warehouses and storage areas. For added versatility, it can be equipped with an optional wheeled base and shovel, making it a mobile and easily transportable solution wherever quick response is needed.

FEATURES

- Manufactured from high-strength polymer
- Exceptional impact resistance and performance in extreme conditions
- Integrated shovel holder for immediate access
- Stackable design for optimized storage and transport
- Compatible with optional wheeled base for easy mobility
