

SHARPS AND BIOHAZARD WASTE CONTAINER

CODE: PC-4

DESCRIPTION

Designed for the safe management of infectious biological and sharps waste. It provides high resistance to breakage and penetration by sharp objects. The container features a secure-fit lid that prevents accidental openings and ensures waste containment. Compliant with safety regulations, it is sterilizable, incinerable, and free of contaminants.

The design promotes responsible handling and protects both healthcare personnel and the environment.

Specially engineered for applications requiring controlled incineration, it ensures clean and safe combustion. Its chlorine-free composition and minimal heavy-metal content significantly reduce the generation of polluting emissions during the combustion process.

FEATURES

- Suitable for hospitals, clinics, and other medical facilities
- Sharps insertion opening designed for safe handling
- Safety lid prevents accidental openings
- Puncture- and break-resistant construction
- Meets all relevant biological-waste safety standards
- Hermetically sealed for secure containment of hazardous materials

Complies with
**NOM-087-SEMARNAT-2002
STANDARD**

Biological
waste only

Hazardous
waste only

Sharp object
protection

Controlled
incineration

DIMENSIONS

 Length	6.3 in
 Width	6.3 in
 Height	10.4 in
 Capacity	1 gal
 Weight	12.9 oz

MATERIAL COMPOSITION

	Chlorine-free
	Total heavy-metal content: ≤ 1 ppm

DESIGN & USE

- The **Sharps and Biohazard Waste Container** is designed for the safe management of sharps waste in medical environments. Its design ensures the secure containment of hazardous items such as needles, syringes, and other disposables, minimizing risks to healthcare personnel
- The secure lid prevents accidental openings, while its durable material protects against punctures. Additionally, it is easy to transport and complies with safety regulations, promoting proper and responsible waste handling

Guaranteed safety in
hazardous waste handling
