

WASTE CONTAINER VIC-500

DESCRIPTION

The material of the waste container **VIC-500** is medium-density polyethylene that gathers the highest resistance to hits and breaks. It's manufactured through a rotational molding process.

- It includes UV protection that guarantees less wear and tear.
- It has two parts: body and lid.
- The lid, slightly larger than the body, achieves hermetic sealing; this prevents the leakage of bad odors and sources of infection and water from entering.
- Its body has a smooth interior and rounded corners that avoid the accumulation of residues.
- It has four caster wheels of 4" Ø that make it easy to maneuver on sidewalks and irregular surfaces; it also improves its transportation.
- Two pickup pockets for auto-loaders (optional).
- It's manufactured under international norms and standards for working with an automated waste collection system.

FUNCTIONALITY

The design of the waste container **VIC-500** makes for an easy manual or automatic transfer of residues.

- You can use any lift system to discharge waste.
- Since it doesn't have edges or defects, it facilitates the cleaning and discharge of waste.

CUSTOMIZATION

We can label it with the legend of the type of material or your logo according to your needs.

FEATURES

CAPACITY: 500 L (132 US gal)

WEIGHT: 83.6 lb.

WASTE CONTAINER COLOR CODING:

grn Organic: Food, fruits, and vegetables.

bl Plastic: Bottles.

gr Inorganic: Fabric, shoes, boxes, etc.

rd Bio hazardous and biomedical.

yl Paper: Paper, cardboards, newspapers, etc.

MEASURES:

Length: 3 ft 4 in.

Width: 24.37 in.

Height: 3 ft 11 in.

Volumes, dimensions, and other measures are nominal and may vary by approximately 2 %.
