

2000-LITER WASTE CONTAINER

DESCRIPTION

- This large-capacity container system, placed on the ground, ensures exceptional mobility, adaptability, and vandal-resistant performance
- Engineered for high-volume waste accumulation, the container includes a dual-side top inlet (nozzle) available in two diameters (3.1 or 5.9 in) to enable efficient waste deposit
- The front unloading door is secured with a special key accessible only to authorized personnel
- Designed for quick installation, the unit delivers strong ground stability and reliable adherence. It can be installed as a standalone module or combined with others to create container stations, clearly color-coded by waste type
- Manufactured from high-strength, UV-protected polymer with an average wall thickness of 5 mm, it also features an anti-graffiti finish for extended service life and easier maintenance

DESCRIPTION

Based on your specifications, the container can be labeled with the appropriate waste type and customized with your company logo.

FEATURES

CAPACITY: 2,000 liters (440 gal)

COLOR: Yellow, blue, orange, green, and grey
