

DRUM FUNNEL WITH LID

CODE: EMBUDO

DESCRIPTION

The Funnel Container is an efficient and safe solution for liquid and waste handling in industrial environments. Designed for placement on 52.8 gal drums, the structure enables clean drainage and helps prevent splashing or external contamination.

Manufactured from high-resistance polymer, the unit delivers strong impact and deformation resistance, even under extreme weather conditions. An integrated hinged lid helps block dirt, water, and external contaminants, reducing the risk of misplacement or loss. In addition, 3.9 in thick side walls provide extra protection for the drum and the surrounding work area, reducing the risk of spills or splashing

FEATURES

- Solid one-piece design for demanding industrial environments
- Impact- and weather-resistant body for daily use
- UV-resistant surface maintains color and structural integrity
- Hinged lid minimizes contamination and improves control
- Large drainage area ensures clean pouring into 52.8 gal drums
- 3.93 in thick side walls provide added protection
- Stable structure keeps the funnel secure when the lid is open

Resists sudden temperature changes

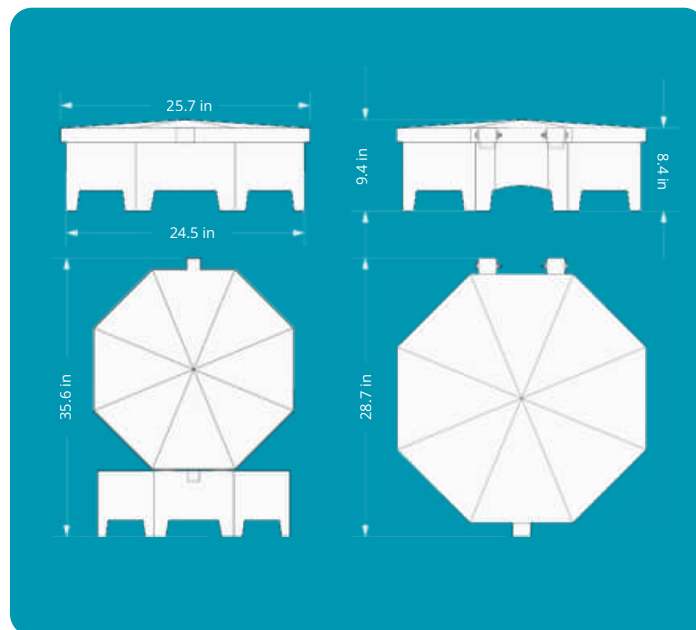

Designed for use with 200-liter drums

Impact- and deformation-resistant

DIMENSIONS

 Height	8.4 in
 Bottom diameter	24 in
 Top diameter	26.3 in
 Capacity	5.28 gal

DESIGN & USE

- Reduces the risk of contaminants reaching the material inside the drum
- Spill control design helps maintain a clean drum and organized workspace
- Safe and controlled liquid or waste transfer into the drum
- Ergonomic, practical design suitable for ongoing industrial operation
- Raised edges provide extra protection against splashing

A robust design combined with practical features to enhance every space

DRUM FUNNEL WITH LID
