

TIUM TJ76 VASE PLANTER

CODE: TIUM-TJ76

DESCRIPTION

The TJ76 Vase Planter is manufactured from high-strength polymer, allowing for a seamless one-piece structure with no joints or riveted connections. This construction eliminates stress points or areas of weakness, ensuring superior strength and long-term durability in everyday use.

Engineered for demanding exterior use, the product features integrated UV protection and can be supplied with or without an additional coating. The aesthetic yet functional design makes the unit ideal for landscaping projects, urban *décor*, and interior design applications.
