

# CCU 24, 30, 36 SQUARE WASTE CONTAINER

## DESCRIPTION

The material of the **CCU Waste Containers** is medium-density polyethylene made through a rotational molding process which gathers higher resistance to impacts and avoids deformations.

They have two parts: a container and a lid.

- UV protection.
- Highly resistant to any weather conditions.
- Square-shaped.
- They have multiple openings to differentiate types of residues: circular, slot, and square.
- A detachable square, circular, and rectangular lid.

## FUNCTIONALITY

The **CCU Waste Containers** are perfect for indoor waste separation.

- They are useful for waste collection and keeping public spaces clean.
- You can discharge the waste by lifting the lid or bending the waste container for complete emptying.
- Easy to clean.
- Avoids sources of infection.

## CUSTOMIZATION

According to your needs, they can be labeled with your logo or the type of material they contain.
