

DOG WASTE STATION

CODE: POPYCAN

DESCRIPTION

Designed for urban hygiene, the Popycan Litter Bin combines durability, cleanliness, and visual integration in public spaces. A robust polymer body resists impact and deformation, delivering reliable performance in parks, gardens, and high-use areas.

A UV-resistant surface preserves color quality during outdoor installation. The V-shaped lid design limits odor release and conceals waste, enhancing both sanitation and overall environmental aesthetics.

FEATURES

- Durable high-strength polymer body built for outdoor environments
- UV-protected exterior preserves appearance during prolonged sun exposure
- V-shaped lid design improves hygiene by limiting odors and concealing contents
- Optional collection bag system enhances operational efficiency
- Compact, functional profile integrates easily into public outdoor areas
- Integrated keyed lock provides secure access for servicing and emptying

Resists sudden temperature changes

Two-piece design consisting of a lid and a bin

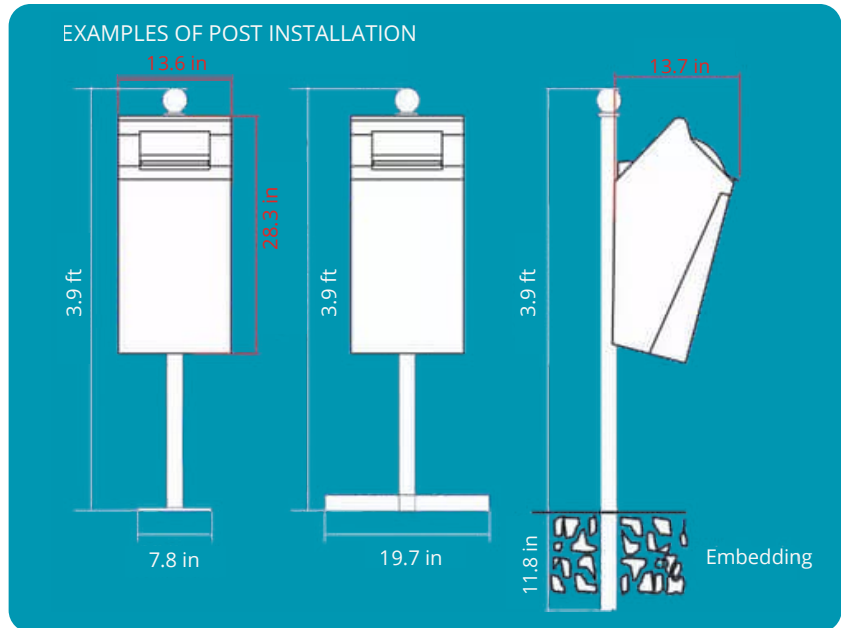

Impact- and deformation-resistant

CONTAINER DIMENSIONS

	Length	13.7 in
	Width	13.6 in
	Height	28.3 in
	Capacity	9.24 gal
	Container weight	13.2 lb

Support post	Height: 3.9 ft. Manufactured from 2" x 2" rectangular steel tubing, featuring a 19.7 x 15.7 in support leg
Embedding	Height: 4.9 ft. The post should be embedded 11.8 inches into the ground
For anchor mounting	Height: 3.9 ft, featuring a 7.8 x 7.8 inches base plate

A robust design combined with practical features to enhance every space

DOG WASTE STATION

- Designed for clean and hygienic dog waste collection and containment
- Lid design helps minimize unpleasant odors in surrounding areas
- Use with collection bags streamlines waste handling
- Enclosed structure limits direct exposure and visual impact
- Contributes to cleaner and safer public environments
- Easy to clean with minimal maintenance requirements
