

PL 1R LIQUID BIOHAZARD WASTE CONTAINER

CODE: PL-1R

DESCRIPCIÓN

The **PL 1R Liquid Biohazard Waste Container** provides secure handling of intravenous fluids and bio-infectious waste in medical, clinical, and laboratory settings. Constructed from polymer with less than 1 ppm of heavy metals and no chlorine, it can be sterilized and incinerated without generating harmful emissions.

Fill level is easily visible, and the unit features a tightly sealing lid with secure locking to prevent spills.

Ideal for controlled incineration, the collector guarantees clean, safe combustion. Minimal heavy metal content and chlorine-free materials help limit environmental impact during disposal.

FEATURES

- Complete safety labeling for handling guidance
- Features universal biohazard symbol
- Suitable for sterilization and incineration without harmful emissions
- Strong construction resists breakage and leakage from accidental drops
- Properly identified as "IV Hazardous Liquids and/or Bio-infectious Waste"
- Easy visual check of contents

Complies with

**NOM-087-SEMARNAT-2002
STANDARD**

Biological
waste only

Hazardous
waste only

Sharp object
protection

Controlled
incineration

DIMENSIONS

 Length	4.5 in
 Width	4.3 in
 Height	6.4 in
 Capacity	0.5 gal
 Weight	4.5 oz

MATERIAL COMPOSITION

 Chlorine-free
 Total heavy metal content: ≤ 1 ppm

DESIGN & USE

Designed for safe containment of contaminated liquids, the **PL 1R Liquid Biohazard Waste Container** prevents leaks and protects operators. Heavy-duty materials and a tamper-proof closure provide reliable performance for biohazard waste management under strict safety protocols.
