

PEDAL FOOT-OPERATED TRASH CAN

CODE: EC-BP-21

DESCRIPTION

The **Pedal Foot-Operated Trash Can** is a practical and hygienic solution for the separation and containment of waste generated in medical and hospital areas. The system consists of three main components—body, lid, and pedal—each manufactured from high-strength polymer to support durability against impacts, deformation, and adverse weather conditions.

A pedal-operated opening system enables hands-free use, reducing the risk of cross-contamination and supporting compliance with health regulations.

FEATURES

- A pedal-operated opening system significantly reduces the risk of cross-contamination and the spread of pathogenic agents
- Manufactured from high-quality polymer, this trash can withstands impacts, deformation, and demanding environmental conditions
- A tight-fitting lid prevents waste exposure, supporting odor control and containment of liquids that may pose environmental risks

Biological
waste only

Hazardous
waste only

Prevents odor
propagation

DIMENSIONS

 Top diameter	13.2 in
 Bottom diameter	10.4 in
 Height	17 in
 Weight	2.8 lb
 Capacity	5.5 gal

AVAILABLE COLORS

DESIGN & USE

- A compact and ergonomic size allows placement in procedure rooms, medical offices, nursing stations, or waiting areas without disrupting workflow or occupying excessive space
- Clearly visible BIHW (Biological-Infectious Hazardous Waste) labeling on the front panel and lid supports accurate waste identification and classification, ensuring compliance with relevant health regulations

Risk-free environment
