

POST LOCKING SYSTEM AND TRASH CAN 240

Locked trash can

Unlocked trash can for unloading

DESCRIPTION:

- The trash can and the lid are made of HDPE through an injection molding process.
- Hinged lid secured with two bolts.
- The two plastic swivel casters and the galvanized steel axle facilitate its transportation.
- The 240 L (63 US gal) capacity of the trash can make it compatible with automatic waste transfer systems.
- Load capacity of 198 lb.
- UV protection.
- Dark gray color.

POST LOCKING SYSTEM

- 14-gauge steel fixing post of 165 × 38 × 1050 mm.
- The base is made of a 3/16" steel sheet plate of 300 mm × 300 mm with two reinforcement brackets.
- It anchors to the floor with four *Extralarge* dowels of 3/8" × 150 mm and four *Ultrafix* hex-head screws of 3/8" × 150 mm.
- Since the safety hook lock features an automatic closing, by pushing the handles down the mounting cavity, the lock activates without needing the key and avoids robberies.
- The mounting cavity consists of two plastic brackets that go into the back of the trash can and serve to secure the handles from a possible struggle from the sides of the trash can against the lock and the post.
- The post is inserted in the reinforcement brackets guaranteeing the necessary resistance in acts of vandalism.
- The lock opens with a triangle key that unlocks the trash can for unloading.
- Painted with powder coating for greater weather-resistant protection.

CUSTOMIZATION

It includes the trash can consecutive number printed on hot stamping and a decal with special adhesive for polyethylene.

TRASH CAN FEATURES

CAPACITY: 240 L (63 US gal).

WEIGHT EMPTY: 31 lb.

MEASURES:

Width: 22.62 in.

Length: 28.47 in.

Height: 3 ft 6 in.

Dimensions and other measurements are nominal and may vary by ± 2%
