

PLAT1-200 SPILL CONTROL PALLET

DESCRIPTION

The material of the **PLAT1-200 Spill Control Pallet** is medium-density polyethylene through a rotational molding process which gathers the resistance to absorb high impacts and avoid deformations.

- UV protection.
- It has resistance to weather conditions.
- It consists of two pieces: a base and a grate.
- Anti-spill pallet.
- The grate serves to collect liquids.
- Stackable.
- It includes a drain plug.
- The storage of flammable liquids is **not** allowed.
- High resistance to acids, bleaches, oils, and other hazardous substances.
- Light and easy to handle.

FUNCTIONALITY

The **PLAT1-200 SPILL CONTROL PALLET** is perfect for industries, storage centers, warehouses, etc.

- Perfect for the stowage of drums of 200 L (52.8 US gal) or containers that drain oily liquids.
- Widely used in the chemical, food, steel, and automotive industries.
- It's made for the organization, transportation, and removal of drums.
- It's specially designed to contain spills in warehouses and loading and unloading areas.

CUSTOMIZATION

According to your needs, it can be labeled with your logo or the caption of the type of material it contains.

FEATURES

CAPACITY: One drum of 200 L (52.8 US gal)

COLLECTION CAPACITY: 41 L (10.82 US gal)

WEIGHT: 24.2 lbs.

COLOR: Yellow base and black grate

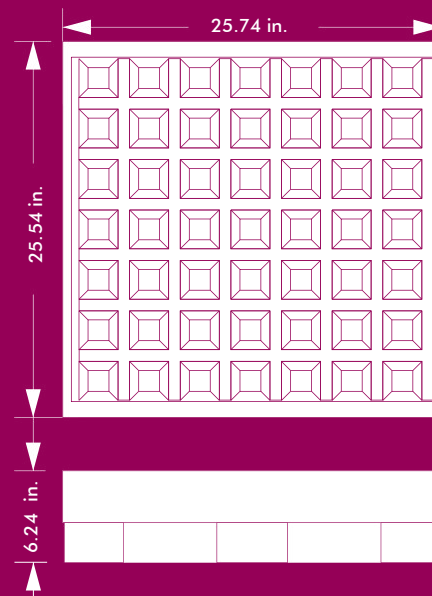

MEASURES:

Length: 25.74 in.

Width: 25.54 in.

Height: 6.24 in.

Dimensions and other measurements are nominal and may vary by $\pm 2\%$

PERFECT IN INDUSTRIAL AREAS
