

500 GENERAL PURPOSE PLASTIC TILT TRUCK

CODE: VOLQUETE - 500

DESCRIPTION

A robust and efficient cart designed for transporting heavy materials in industrial and commercial environments.

Manufactured from high-quality materials, this container features a durable structure capable of handling large loads, ensuring safe and efficient transport of products in factories, warehouses, and construction sites.

High-strength wheels enable smooth mobility, even across uneven surfaces. An optimized load capacity allows use with a wide range of materials, from soil to heavy components.

FEATURES

- Engineered for handling large quantities of heavy materials with consistent performance
- Constructed with strong, high-quality materials to endure tough industrial conditions
- Impact- and drop-resistant design preserves functionality over time
- Adaptable for transporting diverse materials, including soil, debris, and oversized parts
- Delivers secure material transport in compliance with industrial safety standards

Resists sudden temperature changes

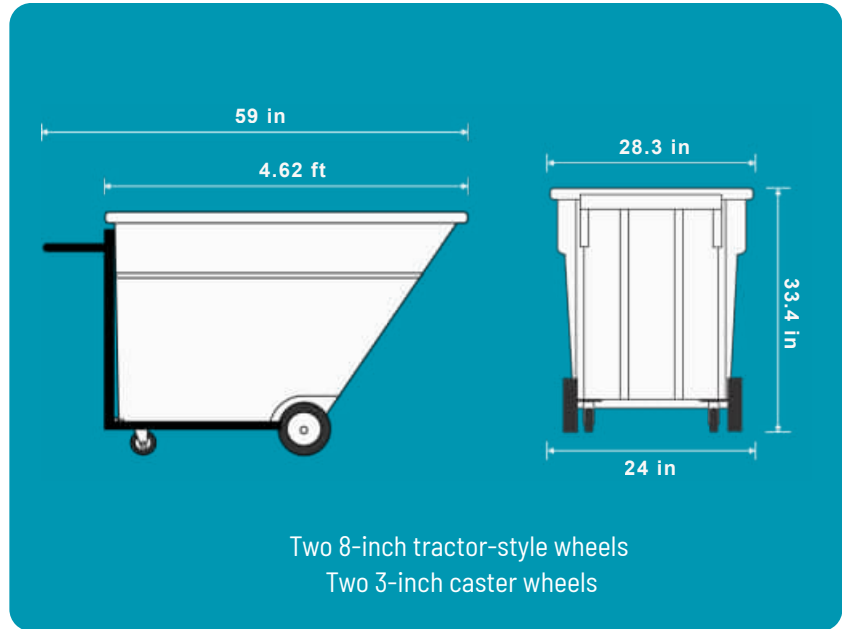

Built to resist impacts

Designed for easy handling

DIMENSIONS

 Largo	4.62 ft
 Ancho	24 in
 Alto	33.4 in
 Weight including handle	70.5 lb
 Weight including frame	103.61 lb
 Capacity	132 gal

DESIGN & USE

- The **500 General Purpose Plastic Tilt Truck** enables safe and efficient transport of heavy materials in industrial and commercial environments. A robust construction combined with high-strength wheels allows smooth movement across uneven terrain
- An ergonomic design and large load capacity enable comfortable and secure handling, improving productivity in factories, warehouses, and construction areas.
- Built for industrial and construction applications, the unit delivers reliable performance and increased efficiency in material handling
