

501 GENERAL PURPOSE PLASTIC TILT TRUCK

DESCRIPTION

A robust and efficient cart designed for transporting light to medium materials across a wide range of industrial, commercial, and service environments.

Suitable for hotels and resorts to move linens, supplies, or waste; for restaurants and industrial kitchens to transport ingredients, utensils, or organic waste; and for markets and distribution centers to handle boxes, fruits, vegetables, or bulk products.

Well suited for waste management tasks and urban cleaning operations, enabling efficient movement of trash and recyclable materials. The cart also performs effectively in retail spaces, warehouses, parks, schools, and public areas for maintenance, landscaping, waste collection, and merchandise handling.

FEATURES

- Designed to transport large volumes of light materials, waste, and products without compromising performance
- Manufactured with durable materials to ensure long-term resistance across industrial, hospitality, commercial, and service environments
- Built to withstand impacts and drops without loss of functionality, extending service life
- Suitable for transporting a wide range of materials, products, and waste, meeting industrial safety requirements for secure handling

Resists sudden temperature changes

Built to resist impacts

Designed for easy handling

DIMENSIONS

 Length	60.2 in
 Width	28.3 in
