

245 TOWABLE ATTENUATOR

Code: REM-245

A leader doesn't follow steps, **he marks the way.**

WHAT'S A 245 TOWABLE ATTENUATOR?

A safety trailer specially designed to attenuate crashes in case of accidents.

Made to protect and cushion the vehicle in collisions by absorbing the kinetic energy bouncing it back into the crash center, and achieving harm reduction.

Perfect for temporary installation on work areas, detours, closed avenues, conflict zones, or towed by a vehicle.

Features

- Made of a 10-gauge RHS structure of 2½ × 2½.
- Impact attenuator.
- The axle bears 3,500 lb.
- Two 15" rims with five lug nuts.
- Two 700-15 trailer tires.
- Two 4-leaf springs.
- Medium-density polyethylene striped bumper reinforced with polyurethane.
- Two rear lights for stop and reverse.
- Additional 10-gauge RHS supports of 2½ × 2½ on the sides.
- Trailer coupler, 2 5/16" welded chassis for tow ball with a capacity of 5,000 lb. and a security chain.
- Built to feed on the battery of the vehicle.
- It includes a mechanical jack for better handling.
