

BUMERANG 140 CHANNELIZER

Code: C-BG-140

WHAT IS THE BUMERANG CHANNELIZER?

The Bumerang Channelizer is an innovative solution designed to guide traffic and prevent lane violations, significantly enhancing overall road safety.

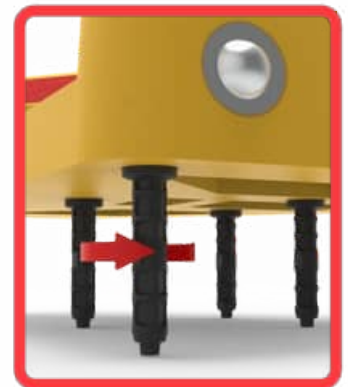

The channelizer's flexible design makes it suitable for a variety of applications: as a lane guide in bike and bus-only lanes, as a central divider in counterflow sections, or as a boundary marker on highway on- and off-ramps.

Unlike conventional channelizers, it is equipped with a tempered glass bead that reflects headlights, producing a bright flash that immediately captures drivers' attention and maximizes visibility and safety impact.

Features

- Made from a single piece of 100% recycled, high-strength polymer, available in yellow, green, or black, with complete UV protection to prevent fading.
- It resists vehicle impacts and is virtually unbreakable, weatherproof, and maintenance-free.
- Featuring a new anchoring system with five durable TPU bolts for superior ground stability, it also provides five slots for type "A" or "B" reflective elements.
- Designed ergonomically with rounded edges, it eliminates sharp points, ensuring user safety.
- At 5.5 in, it acts as a safe and effective traffic control element, enhancing the protection of critical areas and promoting orderly, reliable traffic.
