

# KAYAK 700 SOLAR CHANNELIZER

Code: CA-YAK-700S

We are on the  
next level

## THE CHANNELIZER THAT DISSUADES WITHOUT DAMAGING

The channelizer due its size, is designed to delineate lanes, channelize flow avoiding vehicles invade confined lanes.

Commonly used for lanes of metrobus, bikeways, public transport or counterflows.

It has a solar sphere of LED light with synchronized flashing, improving visibility of all users.

Channelizer has multiple applications that can be used to delineate forks of entrances or exits of highways, toll booths and roads highly dangerous, foggy zones or with low visibility.

## Features

- Manufactured in ABS in a single piece, green or yellow color with UV protection, it doesn't bleach.
- Tempered glass sphere lighted with latest generation ultra-bright LEDs.
- High resistance to vehicle passage.
- Resistant to inclemency, it doesn't require maintenance.
- Body reliefs are non-skid, in addition has two lateral borders around the sphere to protect it.
- Arrow in relief that indicates its mounting position in reference to the direction of circulation of vehicles.
- Design with round borders, without cutting edges to avoid damage of vehicle or bike.
- With 4 anchoring points to guarantee fastening to floor.
- Includes 4 anchor bolts of ABS, which are stored in the lower part of the piece, this optimizes storage and transportation.
- In order to install channelizers, are separated the anchors bolts from the lower part where are stored and are set with pressure in boreholes, ensuring them with a helmet.

### LIGHTING SYSTEM

- Colorless tempered glass sphere with ultra-bright LEDs.
- White or red LED.
- Solar panel and electronic system of high efficiency.
- JVM circuit that synchronizes with wireless transmission that produce a flashing flash coordinating all the channelizers.

# KAYAK 700 SOLAR CHANNELIZER

Code: CA-YAK-700S

Measures are nominal and may vary by +/- 2%.

## MEASURES:

- \* Length: 27.5 in.
- \* Width: 7.8 in.
- \* Height: 2.8 in.
- \* Height with sphere: 3.0 in.
- \* Height with anchor bolt: 5.1 in.

## BODY COLORS:

- \* Green or yellow.

## INSTALLATION

It is convenient to leave a separation between each element from 31.4 in to 3.2 ft.
