

**A leader doesn't follow
...marks the way**

LUX CONE

Thanks to the LED intensification can be seen at long distances.

Suitable to synchronize with other traffic cones, allowing a uniform and coordinated signage, improving visibility and comprehension of indications for motorists.

Poliflexy® cones are better than PVC ones, include UV protection.

Last approximately 10 years without color loss, neither break or degrade by sun rays.

Top cap cover solar cell, it doesn't detach after being run over.

Ideal to use in highways to prevent motorists from accidents, work zones or road closed, perfect to use in open parking lots.

Mainly suggested in work zones, where is performed a road repair or where is required to sign dangers or detours.

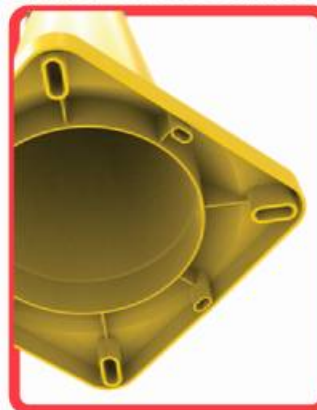

Features

- Body manufactured in a single piece of poliflexy® providing great flexibility and high resistance to impacts; recovers original shape after being run over.
- Option to include heavyweight base, reinforcing stability in windy weather.
- Line colors: orange or yellow (other colors upon request).
- Stackable to ease transport and storage.
- Reflective ring to increase night visibility (Optional).
- These features become solar traffic cones in an efficient and sustainable option for traffic signage and management in different situations.

SOLAR LIGHTING SYSTEM

- Solar energy reduce long term operational costs due is a sustainable product.
- 12 ultra-bright LEDs in red color (synchronized).
- Intelligent system powered by sun.
- Solar cell of 85 mm.
- Two 1.5 V batteries.
- 5 hour-charge for 16 hours of function.

Oval finish for stability

Heavyweight base for greater stability

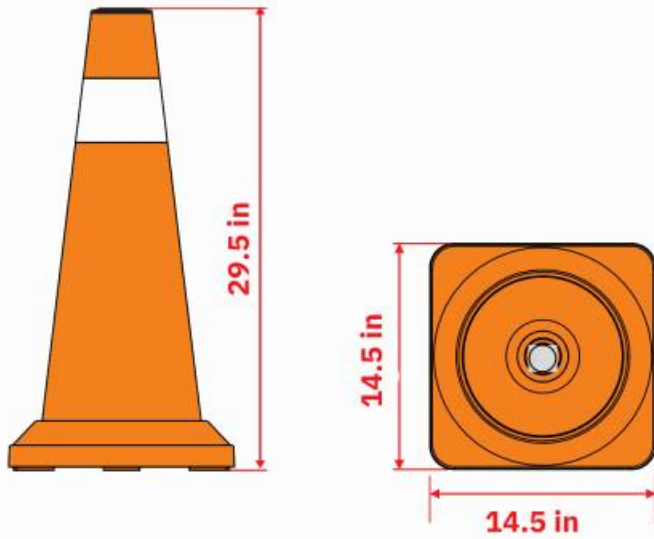

Solar cell

Withstand being run over

Measures are nominal and may vary by approximately 2%.

Measurements

Measures: Height: 29.5 in
Base: 14.5 x 14.5 in

Reflective Tape: 1 ring of 3.9 in of height
White color

A 3.2 ft x 3.9 ft pallet store 175 pcs of 29.6 in (75cm).
