

PVC CONE

Code: CNPVC-90 / CNPVC-70 / CNPVC-45

A leader doesn't follow
marks the way...

ADVANTAGES OF PVC CONES

These devices mark the roads or paths to safely re-direct transit temporarily

These are used to create the separation or fusion of lanes during projects of highway construction or car accidents.

Deviates transit if necessary.

These traffic cones are designed to manage any caution situation that is present in a highway or city.

Ideal in parking lots, parks, field, or the backyard of your house.

In addition, can create zones for campers, dangerous areas or construction sites.

Ideal for sports, activities for children or dog training.

Features

- Highly resistant, this material has UV protection.
- Body and base manufactured in PVC; orange and black color respectively.
- 100% **flexible with memory (returns to its original shape if run over by any vehicle).**
- **It has a solid PVC heavyweight base that avoid it tilts.**
- These are stackable, don't use many space, ease transport and storage.
- Reflective ring to increase visibility during night, **can present in two reflective bands (optional), these alert motorists in low light conditions.**
