

Flexible Plastic Delineator Post

Code: AL-PLAS-E

A leader doesn't follow steps
... he marks the way

Features:

- * It is easy and safe to install on any type of ground, it only requires epoxy glue on the base to anchor it.
- * The base helps for a better fastening, adds stability and style.
- * There's no need for digging the surface course in order to install it.
- * It's designed with a highly resistant and flexible plastic.
- * The corners and edges are rounded in case of impact to avoid injuries to users.
- * It is totally immune to weather changes, corrosion, oxidation, and also has protection against UV rays for ten years.
- * It has a high-tech design that includes two big reflective areas for a total of 21.67 in² of the best Diamond Grade material which gives better visibility from long distances even at high speeds. (The top is 17.27 in² and the bottom is 4.54 in²).
- * You can add a mile number or any other location related to the road.
- * The flexible plastic delineator post 4306 MS avoids blinding between vehicles so drivers don't need to change to high beams. It has a collateral antiglare function that helps reducing accidents and dangerous events.
