

DELINEATOR POST

Code: R-1530

**True leaders do not follow
... they lead the way**

WHAT IS A DELINEATOR POST?

Traffic alignment post with three reflective rings and a heavy base designed to prevent tipping.

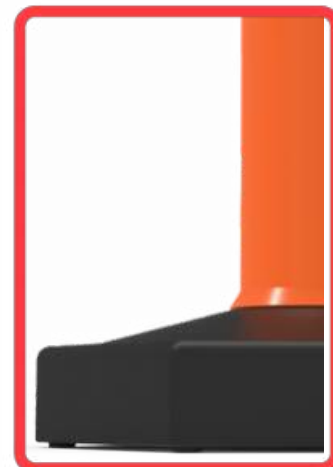

The primary function is to prevent vehicles from entering restricted zones; they define or guide reserved areas, serving as safety traffic delimiters in places such as bike lanes, parking lot entrances, and even to mark crosswalks.

Perfect for contraflow lane, roads, highways, paths, routes, circuits, restricted areas, construction zones, or as traffic signage.

The best part is that no installation is required; it can be either portable or fixed, as it can be used with an empty or sand-filled base.

Features

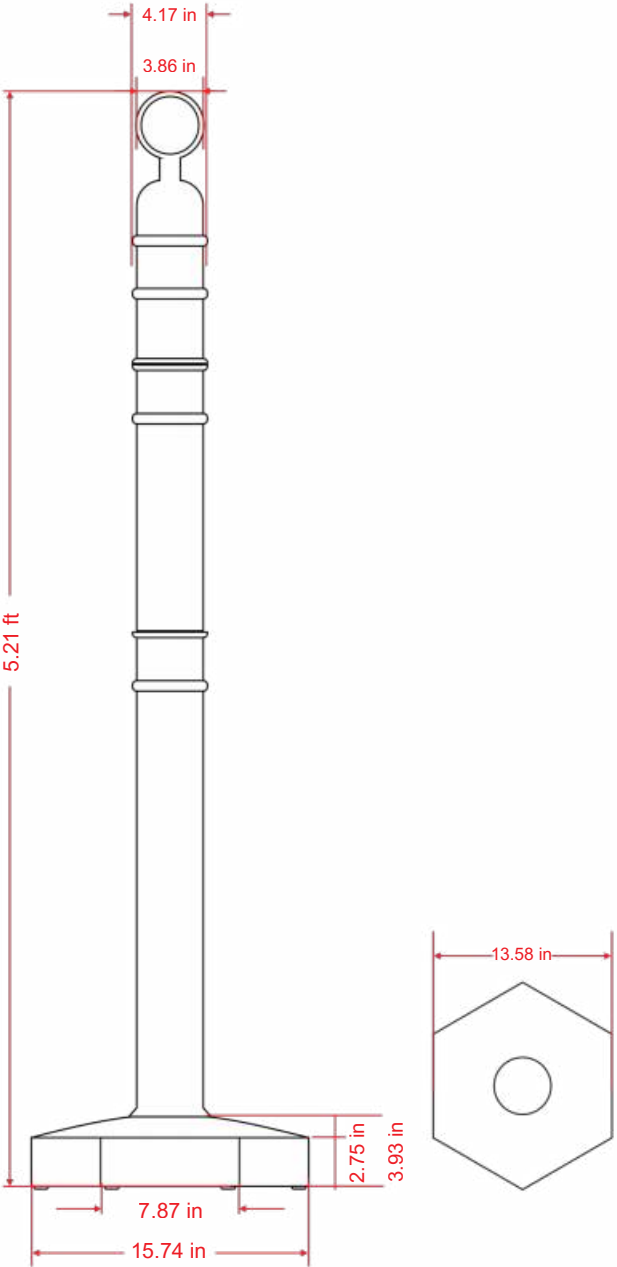

- Allows for the creation of temporary circles and safe traffic direction by clearly marking specific zones.
- Withstands vehicle impacts without causing damage; its robust design poses no risk to pedestrians.
- Made from linear polyethylene.
- Optimal resistance to harsh environmental conditions and extreme temperature changes.
- UV protection included, extending product lifespan.
- Orange post equipped with high-visibility white reflective bands.
- Heavy black hexagonal base provides outstanding stability and wind resistance.
- Equipped with three high-performance reflective bands for increased nighttime visibility.
- Features an additional top reflective to improve road visibility and enable attachment of warning tape or chains.
