

A leader doesn't follow steps
... he marks the way

STAINLESS STEEL ROAD STUD VA-IN

Features

- Its main feature is to quickly and effectively warn the outline of the street or road, especially in humid conditions.
- It has been proven that reduces freeway accident rates with center lines RPM, approximately 0.5 accidents per million vehicles-miles.
- It helps improve road safety; that's why it's on almost every freeway.
- Highly resistant to hits and bumps.
- One or two reflective sides.
- A smooth body without lumps or edges.
- It's perfect for freeways and two-way roads.
- The reflectives are high retro-reflection optical prisms of MMA.
- An optional bolt for better ground fastening.
- Reflective colors: amber, white and red.

Technical specifications

* Made of:	Stainless steel
* Measures:	Length: 3.9 in. Width: 3.9 in. Height: 0.83 in.
* Weight with bolt:	10.5 oz
* Weight without bolt:	6.65 oz
* Filler:	Epoxy mortar
* Prism colors:	White, red and yellow
* Angle of inclination:	30°
* Reflective surface per side:	3.2 in ²
* Useful contact surface:	16 in ²
* Pressure resistance maximum load:	49,770 lb/in ²

Volumes, dimensions, and other measures are nominal and may vary by approximately 2%.
